PARALLEL
Avocats

Parallel Avocats assisted Elemint in several tenders and contract negotiations (including Platinum Group to manage a VIP NFT ticketing service for the F1 Monaco Grand Prix and the Ligue de Football Professionnelle for an NFT video platform).

1. Challenge

As an innovative web3 company, in particular for NFT minting, Elemint operates in an emerging and constantly evolving legal framework. As an expert in intellectual property, personal data and web3 regulations, Parallel Avocats has worked with Elemint to facilitate the conclusion of strategic contracts, as well as to manage the legal aspects of certain calls for tender.

2. Solution

Elemint, assisted by Parallel Avocats for sensitive legal aspects (in personal data, intellectual property and web3/NFT regulations), has won tenders for ambitious projects (such as that for the Ligue de Football Professionnelle) and secured large-scale contracts (such as that for Platinum Group to create an NFT VIP ticketing service for the F1 Monaco Grand Prix).

3. Bénéfices

Elemint's product and its legal structure are complex, so a precise legal vision is necessary for marketing. Managing this dimension with Parallel Avocats enabled Elemint to focus on the other dimensions in order to achieve the best possible business and operational results.

Avis du client

« It was important for an innovative technology company like Elemint to enlist the services of lawyers who are experts in data, tech and web3. Having expert support saves time and allows operational teams to focus on what they do best: delivering the product. We are delighted with Parallel Avocats, whom we recommend for complex tech projects. »

Séverin Naudet

Managing Director of Elemint
