

# Parallel Avocats advised Qotilabs in its sale to Appfire

Parallel Avocats represented Qotilabs in its sale to Appfire.

Qotilabs' Rich Filters for Jira Dashboards, on the Atlassian Marketplace, gives customers enhanced Jira Dashboard capabilities for a broad set of use cases. The app transforms dashboards from static to truly dynamic and interactive operational boards.

Rich Filters for Jira Dashboards will deepen and expand Appfire's offerings and expertise in dashboards within Jira. Qotilabs also offers three Rich Filter extension apps that focus on ITSM, Time Tracking dashboards, and PDF reporting, which fit well into Appfire's solutions.

The Parallel Avocats team that advised Qotilabs was led by Jérémie Aflalo (partner).
