

## Parallel Avocats advised KERYS Software in its €6.2m Pre-Seed financing round

Parallel Avocats has advised KERYS Software in its €6.2m Pre-Seed financing round led by Daphni and supported by Seedcamp, Backtrace, Kima Ventures and business angels Amirhossein Malekzadeh, Sébastien Pahl and Nicolas Steegmann.

Founded in 2024 by Thomas Brethomé, Sébastien Domergue and Sylvain Cassier, joined in early 2025 by Thomas Girard, KERYS Software uses virtualisation to allow several work environments to share a single workstation or server without sacrificing performance or security. Its technology enables enterprises to reduce costs, strengthen cybersecurity and shrink the carbon footprint of their IT. The funding will support KERYS Software in scaling up its go-to-market efforts and accelerating its international growth.

The Parallel Avocats team that advised KERYS Software comprises Jérémie Aflalo (partner) and Awa Yaffa (associate).
