

Parallel Avocats advised Zygon in its sale to Memory

Parallel Avocats has advised Zygon in its sale to Memory, the provider of a SaaS Identity & Access Management (IAM) platform.

Zygon built a solution that detects unmanaged applications (shadow IT) and analyses usage patterns associated with digital identities. Its technology will be integrated into Memory's Identity Factory platform and AI developments, strengthening its identity visibility and governance capabilities. The acquisition is Memory's first external growth move since its €13m funding round completed in 2025.

The Parallel Avocats team that advised Zygon comprises Jérémie Aflalo (partner).
